Migration Magic Button

Easily & Quickly Migrate from Salesforce.com

The Salesforce.com Migration Magic Button by Salesboom.com enables seamless Data Migration for disenchanting Salesforce.com customers. A great demand from current Salesboom.com customers and partners who have once had problems with Salesforce.com lead us to create a simple and easy way for Salesforce.com customers and free trials to get their data out of Salesforce.com and imported into Salesboom.com. The Migration magic button is the first in a series of Migration solutions for other CRM and Contact Management Systems.

With the Migration Magic Button we can:

- Quickly, easily & accurately migrate all company data
- Migrate business processes
- Migrate custom implementations
- Migrate custom tabs and fields

It has long been one of the tricks of Salesforce.com to make data and business process maps & implementations difficult and time consuming to export. This in turn forces customers to stay and eventually upgrade to a more expensive edition once high usage limitations are reached.

The Migration Magic Button breaks the chain that binds users to Salesforce.com and frees them from the hassles of moving their business data and processes to Salesboom.com. Once migrated, Salesboom.com has some of the highest user adoption rates in the CRM Software industry making our customers happy to stay.

Since the evolution of On-demand CRM Software the pain of switching applications is much less than with traditional installed systems making great customer support and service even more important than ever. This is due to the fact that we deal with more standards-based data formats rather than proprietary ones. This combined with our Magic Button makes the migration process even easier for current Salesforce.com clients who want a change.
